Article published on January 20th 2012 | Software

Videos have become the dominant source of entertainment and information. Whenever you need to play a music video, movie or documentary you go for downloading the videos from the internet. Today, tutorials are also available in the video format to guide the users for a specific task. Internet is the largest and dominantly used media to get such videos where thousands of the videos are available on hundreds of websites. Internet has changed the traditional sources like DVDs and video CDs. Now you can download your favorite music, tutorials, documentaries, and even high definition movies from the internet and these videos are also available at no cost.

Not only the downloadable videos are available to play from your computerâ€™s hard disks, but you can also play these videos on the website using your web browser to play the video. This is a real solution to the unplayable videos that are in different formats and could not be supported by your media player application. Mostly these videos are played sing the built-in media player on the website. This solution has made the videos play regardless of the format that is used to compress and encode the videos and either unplayable on your media players.

YouTube is the biggest and largely used platform for sharing and playing the videos online. These videos are embedded in the website using an inbuilt media player application. It is the social media website for sharing and playing the videos online where you can find thousands of videos of your interest to play without investing any cost. Video sharing and playing are provided freely to the global visitors and users to enjoy music, movies, documentaries, self recorded videos and tutorials. Millions of the people are using YouTube for their all needs regarding the videos.

You can play your required videos without installing any media player and even without downloading the videos on the hard disk of the computer. It is a direct interface to search and play your desired videos in no time. You can play your favorite music, concert recordings, documentaries, tutorials and religious videos, and movies on any device that are included a web browser and is connected with the internet. It is very easy to search the desired videos; you are provided with a search bar that can be used to search the exact video in very less time. Not only this, YouTube is an intelligent interface that provides you the suggestions for making sure the availability of the information maximum.

Most of The times you search and get the videos of your requirements and you want to download the videos on the hard disk to play these when you are not connected to the internet. Playing videos without being connected with the internet can only be achieved via downloading the videos from the website, but YouTube does not provide users with downloadable link if you are a Mac user you are required to install a YouTube downloader for Mac. Free YouTube downloader for Mac users from ISKYSOFT is the optimal solution for downloading all the required videos from the YouTube.
