Choosing Astrology and Psychic Readings As a Profession by Yuri Romanov

Article published on May 1st 2012 | Spirituality

It is no longer uncommon or new for us to see stalls that write psychic services such as readings of daily horoscopes, numerology, and astrology. This craft is also, at the same time, a good business as it has become very popular in modern society. When we see newspapers, there are tons of free horoscopes for everyone to see.

Many psychics survive financially solely from doing psychic readings. With the current high figures of unemployment and underemployment, this may very well be a source of livelihood or profession for anyone who has psychic abilities.

However, it is very important for all to understand that foremost, doing astrology and psychic readings should not be a tool to strip off money from people. It has to be a devotion or a mission to provide assistance to those people who are in need of closure, sympathetic ears and even answers to questions.

That is why before jumping in into this and making this a profession, here are some things to always take note of.

1. Acquire a standard level of education before making astrology readings.

Just like doctors and other professionals, becoming a psychic or astrologer entails finishing a standard of education that will make the person capable and reliable in terms of making psychic readings. Simply reading books on the internet wonâ€™t make anyone a professional.

2. Learn from your teachers and past astrologers in history

Aside from education, it would also pay to ask your teachers for an extra mile of lessons. Be more personal by asking them how they have come to master their craft and what sort of practices they have been performing. Also, it may help to research on the names that have made a mark in the history of psychics and astrologers. Finding out more about them can prove to be helpful.

3. Charts without context are meaningless

This is one concept that should always be understood by all aspiring psychics. The charts only present a guide but do not contain the meanings for all. This guide should be checked with the person seeking answers to situations in order to come up with a meaningful and personalized reading.

4. Treat clients respectfully

As a psychic, there are things that are seen within the person. However, always be respectful when giving opinions and advice. It is also important to give the client what they want and not what the psychic thinks they need.

5. Be straightforward

Communication skills also have to be harnessed by psychics. They have to know how to speak and sound like when talking to a client. Though using jargon may seem impressive, this will not make the client understand the actual message.

6. Satisfying clients is important

More than advertising oneâ€™s psychic reading services, the best tools that a psychic has is his satisfied clients. These people are the ones who will be spreading the word and recommending other clients to a psychic.

Indeed, psychic reading can be a lucrative profession. However, it must always be remembered that the main goal of psychics is to help and not to bring clients even lower in the difficult situations they are already in. Moreover, a psychic should be honest and put his integrity over his income.
