Useful Tips on How to Use Psychic SMS Services by Yuri Romanov

Article published on February 1st 2012 | Spirituality

If you are tired of traditional face-to-face psychic readings, you may opt to try a convenient service that is becoming more and more popular nowadays. SMS psychic reading, also referred to as â€œtext-a-psychicâ€• service, has become a standard way for people in this modern age to receive daily horoscopes, predictions, insights, and tarot interpretation in their mobile phones.

However, because most SMS services on mobile phones can only send a limited quantity of text word count per message, it is important that the sender knows how to create messages that are concise but understandable at the same time.

To make the most out of psychic text messaging, here are some tips that could help anyone who is planning to use this kind of service:

1. Keep it short and simple. Make sure that you use specific terms and not general words and phrases that can be easily misunderstood by your psychic. It is important that you cut to the chase and get your point across in as little words as possible.

2. Ask queries that demand shorter replies. If your questions are too open-ended, it could cause the psychic to make long, complicated answers. This could lead people in the conversation to misunderstand each other. In many cases, long replies could increase the bills paid for the mobile phone service provider.

3. Don't ask questions only to challenge the psychic regarding his or her capabilities. Sometimes, people â€œtestâ€• psychics to see if they will give accurate replies. However, in many cases, this is a waste of time because, as stated earlier, quantity of words are limited when it comes to SMS conversations. It is more preferable to go to your main question right away. You can prove the accuracy of your psychic later when you receive an actual answer.

4. Watch out for the word count. Most people who use SMS psychic readings for the first time have one common problem â€“ the text message character limit. In a lot of cases, it requires the sender to use up two to four messages just to get his or her message across. However, as you gain more experience with SMS, you will find that you will be able to get your message across in as few words as possible.

5. Ask questions pertaining to your current problems or issues. It is somewhat useless to ask psychic experts regarding issues and events that happened fifty years ago (unless these issues affect current affairs). For more accurate results, try to ask about recent issues or conflicts you are facing.
