Article published on July 18th 2012 | Sports

Football is a game, which if loved by people of all ages and cannot be ended as the day comes to an end. Now there are a number of options to continue playing even after the night falls. All you need to do is purchase glow footballs and continue playing after dark. Just as your regular soccer ball is perfect for playing around with it in the bright day light, the new glow soccer balls balls lights up with the pressing of a button, permitting you to spot the glow sports balls glowing from a distance spot on the field even in the middle of night!

Like the glow footballs there are also a number of other glow sports balls available in the market which function in the same way. They contain a bright, light within them. A few examples of such game balls are the glow bouncy balls, glowing beach balls, glow soccer balls, etc. These balls that glow are made of substances that lets the light to be transmitted through them so that the ball becomes clearly visible in the dark. These game balls are bright, can be effortless seen, and comes with long lasting batteries. When the batteries finally exhaust out, they can be easily replaced and are easily available at ant sport store or a hardware store. These game balls are available for a number of games like football, basketball, volleyball, as well as soccer. They are all standard sized, sturdy, as well as made for genuine sports use. However, be aware as you can easily confuse this light up game balls with the cheap lighted balls available at a toy shop or flea market.

As a customer when you are intending to purchase glow footballs it is important that you should first understand the difference between a LED light up soccer ball and a glow in the dark soccer ball. The truth is that glow-in-the-dark and LED are not similar concepts. glow sports balls needs to be exposed to light to let it absorb light before it emits light whereas LED lights are battery-powered which can remain lighted for long hours.

These LED soccer balls are very much like the usual, inflatable soccer balls, which are prepared of a fiber-toughened rubber-like polymer material that permits light to be transmitted to the exterior of the ball. The switch provided for illuminating the light is drawn back to avoid turning the light off while the game is still on. You can easily replace the batteries simple by replacing them with new ones. These soccer balls require three LR44 watch batteries to power up the ultra-bright light provided inside the soccer ball. A single set of batteries can light up the soccer ball for a long time. Usually a new set of batteries are provided with every new soccer ball. However, it has been recommending by the various companies selling glow footballs that the customers should also buy an extra pair of batters always. This shall be beneficial to you as you can replace them with the original batteries immediately without waiting to buy new once, once the original batteries have exhausted.
