The 2013 smart fortwo is great for city driving! by Jeorge Thomson

Article published on July 12th 2012 | Auto

If you live in the city of St. Catharines and youâ€™re looking for a vehicle to get you from point A to point B, you may want to consider getting a smart car! The 2013 smart fortwo offers tons of advantages over other cars when it comes to city driving, including excellent fuel economy, compact design and secure safety featuresâ€”all for an affordable price!

Excellent Fuel Economy

You may not know this, but city driving is actually less fuel-efficient than city driving. Why? Highway driving requires less braking, which also means it involves less acceleration. When a driver has to make frequent stops, as required with city driving, there is more acceleration involved, which uses more gas. So, if youâ€™re a big city driver, you should consider the fuel consumption rating when purchasing a vehicle. The 2013 smart fortwo has an excellent fuel consumption rating of just 5.8 Litres/100 km. Not only will this save you money in the long run, but it will also save you from frequent visits to the pump!

Compact Design

The 2013 smart fortwo features a modern, compact design that is both eye-catching and practical. A large panoramic roof made of break-resistant carbonate, flared front fenders, beefy side sills and a revised front end give this updated model a stylish, aggressive new look. The fortwoâ€™s interior is filled with hidden storage compartments, creating an unexpected feeling of spaciousness and comfort. In addition, the smart carâ€™s small stature makes city driving much easier. Think of how easily youâ€™ll be able to handle curves, change lanes and parallel park!

Secure Safety Features

Just because the smart car is so small, doesnâ€™t mean it isnâ€™t well equipped in the event of an accident. Its structure is made of a tridion safety cell, which is reinforced with strategically placed high-strength steel. It also has crash boxes in the crumple zones to ensure the tridion safety cell doesnâ€™t get damaged in a collision. The smart car also has all of the usual featuresâ€”electronic stabilit program (ESP), an anti-lock braking system (ABS), air bags, safety seats with integral seat belts, brake assist and cornering brake control (CBC).

If youâ€™re interested in the 2013 smart fortwo, visit the smart centre, a PerformanceCars dealership for a test drive today! You can take advantage of our amazing smart car limited-time offer: lease a new 2013 smart fortwo for 24 months and pay only $99 a month. Now thatâ€™s a deal!
