Features and technological innovation of dual SIM mobiles by Amit Sachdeva

Article published on February 15th 2012 | Technology

Inthese dayspeoples are crazy about dual SIM phones.Dual SIM mobiles are becoming popular day by day because in this kind of devices user can use two different connections, normally from two different operators. In some cases it is essential for peoples to carry two different mobile phones to keep their professional and personal life separate. However the dual SIM devices present us the option to use a single phone rather than carrying two diverse mobile phone devices.

Type of dual SIM mobile phone: Dual SIM mobile phones are two types:

Â· Standby Dual SIM Phone:SIM cellular phones, dual-SIM plugs were created accessible to utilize in frequent cell devices to let them to include two SIMS and to swap from one to another according to the need.

Â· Active Dual SIM Phone:The on the go dual-SIM phones are able to perform with two SIMS, both of them might be effective as well.

Mobiles are manufactured by many companies, and Samsung is one of them which manufacture dual SIM mobiles as well as CDMA dual SIM mobiles. A broad variety of dual SIM mobile phones from Samsung loves the fun with 2 SIM cards that come with a highly effective power supply. Samsung is an innovator in the cellular market and has also been enhancing their functions with enhanced technological innovation. With the passage of time Samsung brings new and latest designs as per the customer needs.

Today Samsung dual SIM mobiles are in great demand in every age group of people. The most important thing is that these mobiles are also cost-effective and in addition you also get many functions that are only to be found on the expensive devices. There are a variety of Samsung dual SIM phones such as chat 222, C5212, chat 322, star II duos, Hero 2232 and many more that come within a budget of 4100 rupees. Then any one can afford these dual SIM mobile phones because they are cost effective.
