Article published on December 17th 2011 | Travel

Come winter and Kids Snow Boots are high in demand as children love to be outdoors in the snow, Menâ€™s Snow Boots and Womenâ€™s Snow Boots have the highest sales because for places where it snows heavily in winter, there is hardly any option to wearing snow shoes other than staying at home.

Kids Snow Boots

Kids Snow Boots are usually made of synthetic material that is water proof because kids snow boots are worn not just on snow but also in wet slushy weather. The sole is usually made of rubber with a heavy tread so that water does not enter the shoes even when kids walk and run around in wet and slushy places. There is good insulation so that the cold from the outside does not creep in and make the feet cold. The insulation layer in Kids Snow Boots is just after the waterproof layer. Kids Snow Boots are usually lined with fleece or some such warming material to keep the young feet warm in the coldest and wettest winters. Like all snow boots, Kids Snow Boots are high on the sides and reach up to at least half the calf length and have to be comfortable for kids to play in

Menâ€™s Snow Boots

Although Menâ€™s Snow Boots have all the features of Kidâ€™s Snow Boots, they also can be slightly different. Like Kids Snow Boots, Menâ€™s Snow Boots are waterproof, insulated from the vagaries of a harsh winter and are lined with a warm comforting lining. The difference is in the fact that Menâ€™s Snow Boots can be made of pure leather that has been cured to make it water proof. The better quality outer boots are because menâ€™s snow boots need to be more lasting than kids snow boots that they just out grow. That is why the uppers, the insulation and the lining can be all good quality and more lasting.

Womenâ€™s Snow Boots:

Like Menâ€™s Snow Boots, Womenâ€™s Snow Boots need to be more hard-wearing than the kids snow boots. They are different from the Mens Snow Boots because women are more fashion conscious than men and need to add the style factor to their apparel and footwear even if it is for a necessary function like walking in the snow or in wet weather. Also womenâ€™s snow boots can come in many styles and colors. Embellishments such as buckles, bows and buttons can be used to make the womenâ€™s snow boots prettier. The higher costing shoes can have exclusive material and also different heights, turn ups and other styles. Because for Womens Snow Boots are not just footwear that can be worn in winter , they represent the style statement that women would like to make.
