Making a little profit out of canvas photo printing by Andrew Bourke

Article published on April 19th 2012 | Visual Arts

Canvas printing is amazing and If itâ€™s not an old work of art painted on a more traditional piece of canvas then itâ€™s a more modern work of art or indeed a canvas print from photos or some kind of design that has been printed onto canvas because you can get that sort of canvas that you paint on and you can also get the sort of canvas that you print on to which is called inkjet canvas. This is mostly used for printing on with large format or indeed small printers which is commonly used for photographers and artists alike

canvas prints has been around and hanging on our walls for centuryâ€™s In this current interior climate I would say that we would really miss the great benefits that a canvas print has to offer as yes we all love to put our photos in a normal photo frame which is the more traditional way to hang or most favourite images and photos and even these days you can get picture frames that have a different look to them to but if you was to think of what it would be like without canvas photo printing then there wouldnâ€™t be a away to express art and at a fast and quality fashion, basically you can paint a picture of a photo but this takes time and what if you wanted sell lots of your artwork but with it taking a long time to paint each canvas painting then your customers would be waiting a long time to which is why I would recommend that if you do have any of your friends and family or even a client awaiting for a painting form you then why not offer them the option of having your artwork printed on canvas.

Your customer could purchase from yourself at a reduced price and then you could make a small profit from it to without having to actually painting it again. All you need to do is send it of to be printed and the canvas printer can print at a much smaller size for you and not only that bit it will be on a canvas print which has a better feel to it than you would from something that is kept in a draw because it was too big to hang ups The good thing about being able to choose any finish and size of canvas print is that you can have it pretty much tailor made to how you want it and at what size you want it to also Vic versa you can get a small image printed onto a large image which normally tends to be the most popular of options as some people tend to want the original photos that they have had kept away for a while that they would love to have blown up, that the beauty of canvas printing as the ideas and ways of printing images and photos to canvas is very limitless letâ€™s say you have a large photo or poster that you want to hang up but itâ€™s far too big for the wall space that itâ€™s going to be hanging on. There is lots of ideas you can gain from having canvas photo printing as an option when you what to print allot of photos on canvas for a surprise present and really just want to give someone something very special then what you could do is print all of your friends and family associated with some kind of occasion then you could give that away as a gift and Iâ€™m sure they would be over the moon with the idea and the finish that you get from having some personal photos printed on canvas.
