BinaryWave - SharePoint Support and Administration by CHUN Wilkinson

Article published on July 16th 2012 | Book Marketing

BinaryWave specializes in providing managed services for the support, administration and optimization of Microsoft SharePoint Products and Technologies. Clients across a wide range of industries, from healthcare to government, engineering, construction, energy, nutrition, real estate and technology rely upon BinaryWave to manage, monitor, maintain and optimize their SharePoint ecosystems. Founded by Eric Shupps, internationally recognized author, speaker and five-time SharePoint Server MVP, our consultants, technicians, engineers and architects are the best and brightest in the industry. Every staff member is fanatically dedicated to providing creative solutions, on-demand expertise and superior customer service.

BinaryWave can help you:

â€¢ Identify, isolate and troubleshoot performance bottlenecks.

â€¢ Reduce downtime and improve service levels.

â€¢ Accelerate page load times.

â€¢ Conduct thorough load and scalability testing.

â€¢ Review custom code for performance issues and compliance with best practices.

â€¢ Provide end-user technical support.

â€¢ Manage farm wide security and permissions.

â€¢ Deploy patches and upgrades.

â€¢Migrate content from earlier versions, file shares and other platforms.

â€¢ Implement a comprehensive data protection and disaster recovery strategy.

â€¢ Perform routine system health checks.

â€¢ Establish effective governance policies and procedures.

â€¢Gain insight into key system metrics.

â€¢ Identify growth and utilization trends for effective capacity planning.

...and much more!
