100% Recycled Rubber Mulch by James Blee

Article published on June 1st 2012 | Business

In this highly fast and continuously changing world all of us have finally realized that we cannot just go on spending lives without becoming a part of the ongoing worldwide movement, which is for the protection of environment and sustainable living. All of us now feel the need to do our part to protect the environment and doing a small part also work wonders. One such opportunity to make a small difference is right in front of us. It is the practice of using the 100% recycled playground rubber mulch.

This kind of mulch is made from rubber tires after recycling them and it has become one of the most attractive options for mulching in the market. Not just rubber playground mulch, it is also appropriate for mulching athletic fields, landscaping, flooring and horse arena footing. Some of the most attractive features of this mulch are as follows-

â€¢ Cost effective

This mulch is considered as the most economical option as it lasts very long. Most companies that manufacture this kind of rubber mulch give a warranty period of at least 10 years. It does not fade for around 12 years and doesnâ€™t decay for at least 25 years. Thus, it has an edge over the conventional wooden mulch.

â€¢ Environment friendly

As it is made of completely recycled old rubber tires, it is the most environment friendly option. It is clean, odor free but also protects the plants. It also prevents the growth of moss and fungi and helps the soil in retaining its moisture as the mulch doesnâ€™t absorb any.

Above all itâ€™s sturdy and strong and also safe for children at the same time as its non toxic. All these reasons make the rubber mulch a sensible and a long term investment and also ensure that our duty towards the environment is done.
