A Brief Guide to Purchasing Club Car Parts by James Blee

Article published on December 13th 2011 | Business

Renovating golf clubs is a big challenge but you can make it simpler provided you manage to get the desirable club car parts to replace the ones that go out. There are a large number of similar accessories and parts that provide every car with an additional touch of innovative features thereby making them highly stylish and unique. Here are some of the most highly rated club car parts available in the market today.

Combo Kits- This is one of the highly admired accessories that are used to drive and park the vehicle at a higher altitude off the ground. The combo kits usually come with wheels and tires along with related tools. The price ranges from 400 to 1000 dollars depending on the quality of product that is being purchased.

Propane Heaters- This is a perfect accessory for the golfers who prefer to be out in the field even it is real chilly outside. The propane heaters are fixed right in front of the vehicles and are capable of making it warm and comfortable for the golfer sitting on the car. The heaters can last for five to seven hours at a stretch and an automatic shut off valve ensures that the flames never go out.

Voltage Convertors- The voltage convertors allows golfers to attach multiple electrical devices to the vehicle. The convertors generally work with 36 or 48V batteries and costs between 150-200 dollars.

Tune up Kits- Similar to every other kind of automobiles, the golf carts too need periodic tunings and tune up kits are best suited for the purpose. They come in large varieties depending on the model and make of the car. They cost between 20-40 dollars.
