A Wake UP Call to Save Environment by Jullia

Article published on February 1st 2012 | Business

15% of the 60 million toner cartridges sold across the United Kingdom are remanufactured which shows rest cartridges are chucked in landfills as waste every year. According to environmental scientists and recycling experts empty and waste toner cartridges are harmful to environment, mother earth and natural resources because of the fact they contain plastic substance themselves which is composed of polymers.

According to experts the engineering grade polymer is set to take approximately 1000 years to decompose. Approximately 1000000 sea creatures are estimated to have crumbled due to waste empty toner cartridges each year across the world. According to environmental scientists and geologists earthquakes are set to occur due to changing ecological conditions around the world.

Ice Mountains, glaciers and galaxies are estimated to have melted due to global warming across the world. These are alarming signs for us as wake up call to think seriously about saving the mother earth, natural resources and environment by way of printer cartridges recycling. Greentech are devoted in this wake up call to save the environment and natural resources by recycling your printer cartridges in United Kingdom and across the country since 2000.

Simply they collect your empty toner cartridges for cash in UK via you could serve the charities, schools, private & public sector, NGOs and local football teams across the country for good cause. Their mission and objective is to let go environment green and preserve the natural resources crossways the country through your toner cartridges recycle for cash. This is an exciting opportunity for those who want to collect charity to support their schools, institutions and local football clubs in the country.

According to recent studies conducted by many environmental scientists around the world natural resources including oceans, sea, rivers, lakes, streams and cascades are estimated to have polluted due to pitching of waste and empty toner cartridges in United States of America, United Kingdom, Australia, Canada, and across the world. This creates a wake up call for us to think seriously about the ink cartridge recycling as quickly as possible.

UKâ€™s popular and dedicate recycling industry steps forward to save the natural resources by way of printer cartridges recycling all over the country. While speaking about environmental pollution many pollution experts stated climate conditions are getting warmed day by day and this is happening due to chucking of the empties including toner cartridges, cellular phones, beverage bottles, packaging boxes, plastic bags, and malleable materials in landfills across the world each year.

This creates a wake up call for us to keep environment pollution free. Greentech are one step forward to reduce waste and keep environment pollution free by way of recycling ink cartridges in UK and across the country. This is the mission of recycling industry to let environment go green and preserve the natural resources dirt free.
