Agrochemicals Market in India 2011 by [Bharatbook](#)

Article published on June 20th 2012 | [Business](#)

Agrochemicals allow for sufficient food grain production in India. It has been traditionally used by the farmers to increase their farm yield. India is one of the fastest growing economies in the world and so is its population. In order to feed the ever growing population, cultivation of crops has to be on a very large scale and agrochemicals helps the farmers to do the same. The market for agrochemicals is growing in India owing to the changing policies of the government and increasing production. Even though Indian manufacturers are generally generic producers, the production of pesticides is increasing to fulfill the needs of the farmlands. Multinational players, present in the Indian market, have been constantly looking to develop new pesticide molecules. Increasing manufacturing capacities of the players is likely to boost the overall supply and will also bridge the demand supply gap.
