Article published on November 26th 2011 | Business

BE Broadband has three main packages to choose from. BE Value is the cheapest of them all and is ideal for those who mainly use it from browsing and emails, as the speeds are slightly lower than the other two. It has up to 12 meg download speeds, with up to 1.3 meg upload speeds. You do not need to worry about monthly allowances, as the usage is unlimited. This all costs for Â£17 per month.

BE Unlimited is of course unlimited and has up to 24 meg download speeds and up to 1.3 meg upload speeds. The monthly price is Â£22 per month. BE Pro has up to 25 meg download speeds, but a faster meg upload speed of 2.5. The usage is also unlimited and you can also get a static IP address with the option to go up to 16 static IPs if needed. This is for more professional and advanced users with the cost of this deal being Â£27 per month. All the contracts last for 12 months, but the Unlimited and Pro packages are also available on a three month contract if preferred. This gives you great flexibility and choice over the time you spend with BE broadband.

You are able to check the broadband speeds on their website before signing up to a deal. This will show you how fast it will be within your location. All you need to do is enter your landline number and postcode, making it very quick and easy to do.

BE also provides landline options that you can combine with your BE Broadband packages. This will save you even more money and give you the chance to manage your finances much better by having just one monthly bill. It makes it easier to sort out any problems as well, rather than having to contact two different providers.

The Basic landline costs Â£10 per month, so less than it would be with BT. It is ideal for those who do not use the phone that much as there is no included free minutes. If you work full time but make calls during evening and weekends, then Evening and Weekend is ideal. It gives you free calls to UK home numbers from 6pm to 6am and during the weekends. This costs Â£11 per month. Anytime is perfect for regular phone users as it offers free calls to UK landlines around the clock for just Â£14 per month. It also has various other useful features to help save you some money. Make sure you check the terms and conditions to be sure of everything beforehand.
