Article published on April 2nd 2012 | Business

Automated Teller Machine has revolutionized the industry with its feature of instant cash disposal. Whenever you are in need of money you donâ€™t need to go to bank and deposit a check for withdrawal of cash just insert your card and get your desired amount within minutes. Hassle free and convenient atm machine is definitely a blessing in todayâ€™s world. But improper use of these machines has given rise to criminal offences which has posed serious security concerns for individuals accessing the ATM.

In order to avoid such crime and scams it is essential to be alert and increase your safety while using this machine anywhere and at any point of time. The first and the foremost thing that you need to keep in mind while making transactions through the machine is to pay attention to your surroundings. People using drive-through machines as well as standalone ones can be targeted by criminals..

You also need to be alert regarding the person standing behind you in the queue as he might pretend to be engaged in an in-depth cell phone conversation and can closely approach you to take a quick photo or video of your bank card or PIN transaction to have an easy access to your bank account and relevant details. You have to even be cautious from the person who is using the machine before you as he can be a criminal just waiting for his opportunity to steal your card, PIN number and bank account number for his personal use.

Hence it is essential to be careful while using these machines as they are useful but at the same time even risky. The above mentioned tips are just a word of caution so that you can use the service and also stay safe at the same time.
