Article published on June 21st 2012 | Business

The China biofuels market, which includes bioethanol and biodiesel, is estimated to reach a production capacity of 10 mn and 2 mn tones by 2020 respectively. Biofuels has huge growth potential in China. Recently, domestic and foreign players have formed joint ventures to start developing second generation biofuels. The government is taking initiatives by investing in the development of marginal land on which non food crops can be grown for the production of biofuels. Demand for clean energy sources along with governmentâ€™s support will drive the biofuels market in China.
