Article published on July 17th 2012 | Business

Do you fancy cable spaghetti in home or office? Do you love the challenge of tangling out interwoven mass of cables and wires? We hope you donâ€™t. In fact, none of us like sorting out a bunch of cables and wire tucked together with dust bunnies. Thatâ€™s the reason so many cable and wire management solutions are there for you.

What to expect from an efficient cable and wire management system?

It solves three common problems that occur in home and office wiring.

Safety â€“ In case you are not sure, heavily tangled and interwoven cables and wire can increase fire risk. Main reason is chances of damage to insulation from friction and natural corrosion. Properly labeled and neatly tied cables and wires reduce these risks considerably.

Convenience â€“ Itâ€™s the second biggest benefit of efficient cable and wire management. Whenever youâ€™ll have to work with clutters of cables, youâ€™ll surely feel better to work with nicely clustered and color-marked cables and wire. Youâ€™ll require less time and effort.

Cost efficiency â€“ Cost benefit might sound a bit odd as most of the cable and wire management systems come with a hefty price tag. However, that one time cost would surely save lot of future expenditure. Efficiently managed cable and wire would make the job of wiring mechanics easy and theyâ€™ll charge you for lesser hours.

There are too many tools and systems for efficient cable management. Many new technologies are coming up too. However, we have tried to list few common tools to make your home and office space free from cable and wire related clutters.

1. Zip ties and tie wraps

These are basically fasteners made of nylon and vinyl. They are easy to use and are available in different colors and sizes.

2. Cable cover or hider

Are you laying cable or wire across the room? Itâ€™s better to keep them out of sight tucked inside cover or hiders. They keep cable safe and make your space look better.

3. Cable raceway

Similar to covers and hiders, raceways also help in keeping the bunch of cables and wires out of sight. These are mainly PVC made. You can get them with adhesive base or you can fix them onto wall.

4. Wire duct

This is another type of cable and wire management tool. They donâ€™t completely hide cables but they come in different slot options for various wiring purposes.

So, manage cables and wires and consult with experts for specific requirements.
