CARITA launches a new perfume by Millesimebeaute

Article published on February 2nd 2012 | Business

Described as a modern ambry-floral, the Carita fragrance opens with an aldehyde effect, intertwined with a pairing of bergamot and paradisone (a type of hedione, a fresh and slightly floral note). The powdery-floral Carita heart blends rose, violet, heliotrope and iris.

The more oriental Carita trail pairs amber with musks and a vanilla tonality. Perfumer: Alberto Morillas, Firmenich.
