Cheap minicabs are often the best way to get around. by Mary Porter

Article published on June 20th 2012 | Business

Why are cheap minicabs so popular?

Cheap minicabs are a great way to get around for several reasons. Firstly, they are much cheaper than black taxis. Black taxis are often about twice as expensive as private hire vehicles and they donâ€™t get you there any quicker. When you find a private hire firm that you like, you will find that they are very reliable. If you use then regularly, you often get the same driver which is very reassuring. They operate 24 hours a day and will take you where ever you want to go to. They have come a long way in the last few years, and they are just as professional as black taxis.

Are cheap minicabs a good idea for getting to and from the airport?

One of the best ways of getting to the airport is with Cheap minicabs. You donâ€™t have to worry about parking or how much it is going to cost you as you will be able to get a quote in advance. If you need to go between airports and time is a high priority, you can be sure that cheap minicabs are the best way to get there. Buses, coaches and trains can be very problematic and are more prone to delays than any other form of transport.

Where is a good place to find cheap minicabs, especially for airport transfers?

There are obviously lots of choices when it comes to cheap minicabs. However, if you narrow it down to reliable firms that specialize in airport transfers, it is not so easy. One firm that is worth a special mention is called www.aiparking.co.uk. They have really knowledgeable drivers who will ensure that you get to your flight on time. The vehicles that they operate are all very new and very well kept. When it comes to cheap minicabs, they stand head and shoulders above their competition. Once you have used them you will never dream of looking anywhere else for your cheap minicabs.
