Article published on December 13th 2011 | Business

My work is such that I have to travel long distances. And during that I used to get bored on my way to another city for field work. I thought about reading a book but then my colleagues used to make so much noise it used to become so hard to focus. Then I thought about copying some songs and may be a movie in my cell phone and enjoy it on my way. But for that the movie should be in a compatible format and its size should also be cut down. I asked a friend which format should I use and he recommended MP4.

MP4 format is also a container format and it's the best for portable devices as it reduces the size without any compromise in quality. The best thing about MP4 format is that it can hold subtitles, still images and audio/video content all in a single file. This works best if I want to convert a DVD with its features like subtitles etc intact. I get the best quality and enjoy other features as well. Just like a DVD in MP4 format we can have menus and user interactivity and extra features. It's because of its handy and useful format that MP4 players have become so popular. It has revolutionized the video market.

But to convert dvd to mp4 , I needed a reliable converter which also handled portable devices. I came across the Aimersoft DVD ripper. This is the best money could buy. It supports almost all the portable devices like iPod, iPod Nano, iPod Classic, iPod Shuffle, iPod Touch, iPhone 4, iPhone 3G, iPhone 3GS, Apple TV, PSP, PS3, Xbox 360, General 3GP Mobile Phone, BlackBerry, Archos, Creative Zen, Zune, iRiver, Pocket PC, Smart Phone, PDA, etc. Secondly, it can ripdvd to mp4 ,AVI, ASF, MOV, M4V, MKV, WMV, DV, VOB, MPG, TS, TRP, DPG, 3GP, 3G2, FLV, F4V, and SWF. One of its useful features is that it can extract Soundtrack and other audio from a movie. So I get the best quality audio at no cost. It has a faster conversion rate than most of the rippers in the market. We can also merge, split and edit the movie. With Aimersoft DVD Ripper it's possible to convert for both windows and Mac Os.

Now I can watch movies on my cell phone at ease and in the best quality print one could wish for. Not only can I use it for my portable players but it also runs well on my laptop and I can easily save my favorite movies on disk instead of having to carry DVDs around. Now I enjoy my journey more than before and also don't miss on any movie or TV show because of my busy routine. If you also want to make the most of your time and not miss out on movies or videos,Aimersoft DVD Ripper is the answer.
