It's such a hard decision to choose the appropriate type of stove with the plenty of options available in market. So as to make your selection decision easier, I will give you some tips to how you should choose perfect stoves for your needs. If you are thinking that if you will purchase most costly stove of reputable brand without understanding your needs then it may not be perfect for you.

Sometimes people just select stoves by seeing their design and overlook its heating aspect. But you should never purchase just an eye catching piece of stove and always remember one thing that its primary function is to give sufficient heating to room. And if it not able to perform its primary function then your investment in stove will be of no use. Besides give heating to room it has several other function also like you can use it for cooking purpose or for heating water. So first of all you have to make sure that for what purpose are you purchasing it? And then choose stove accordingly.

While selecting stoves, the place where you will install it also plays a very important role. As it release smoke also, so make sure to place it in such a place where no one will have any one with smoke. And also see that how much space you have to install it as it will decide the size of stove you should purchase.

Now we will take a look at the types of wood burning stoves available in market so you can understand that which one will be best for you. Three major types are available in stoves which are box wood stoves, Air tight wood burning stoves, Pellet wood burning stoves. The first one is similar to the original design of wood burning stoves. It is comparatively cheaper than other types of stoves.

Another type is completely sealed which makes it efficient. In it fuel and heat provided is very easy to adjust. So it is well known for maintaining temperature. Metal is used to manufacture it. It enables smoke to escape from side wall. Last type that is Pellet wood burning stoves is very good for environment because it gives very less ash while burning. All the above types use wood as a fuel but you can use wood chips, waste paper also.

Now the place to purchase all the mentioned types of stoves is [simplywoodburningstoves.co.uk](http://www.simplywoodburningstoves.co.uk). Here only you will be able to get your required wood burning stoves at cheapest cost.
