Difference Between All Type of Trucks by Liza Smith

Article published on December 18th 2011 | Business

Trucks are divided into many types determined by the trucking authorities and also they are available in different styles. But, there are some of the classifications that are accepted universally. These classifications are made overall according to the gross vehicles weight rating. The gross vehicles weight rating includes the entire weight of the heavy trucks or trailers, cargo, passengers and the accompanied tools. This classification is divided in different categories and according to this classification; they are divided in different sections like Heavy duty, Medium duty and Light duty trucks. These classifications are explained here in this article in brief.

The Light Duty Trucks

There are 8 Class of trucks divided according to the GVWR. The Light Duty trucks that are having lightest hauling capacities of goods and cargo. These vehicles are used by the regular cargo transporters and also are the best examples of vehicles that are having better traveling abilities also. These Light Duty trucks are having the capacities of hauling loads of 0 pounds to 10,000 pounds. This weight can also be measured as 4,536 kg. These vehicles are manufactured by different manufacturers and Titan, Nissan, GMC and Ford is some of the most popular names in this category. The F series of Ford is the largest and longest chain of manufacturing in this light duty trucks for sale models. Some of the most popular models of this category are Tacoma, Sonoma, Titan and F250. The Tow trucks, SUV, Salvage, Flatbed, Dump and 1 Ton Trucks are some of the most popular types of truck models.

The Medium Duty Trucks

The Medium Trucks that are including Class 3, Class 4 and Class 5 Trucks that are categorized by GVWR. These vehicles are having aggressive capacities of hauling 10,001 pounds to 19,500 pounds. These pounds can also be calculated as 8,845 kg. These medium duty vehicles are quite popular for transportation of raw materials, passing on the industrial products and also in making the goods reached to the ultimate users. These are the most frequently used and demanded trucking types by the transporters. These trucks are having different specialties like dual-rear wheels or even four-rear wheels. The prime manufacturers are Ford, GMC, International, Mack and Kenworth Trucks. These are the quality manufacturers who are having huge capacities of making the engines with better efficiencies and smarter performances. The Crane, Garbage, Lift, Hook lift and Pickup Trucks are some of the most popular types of Medium Duty Vehicles.

The Heavy Duty Trucks

The Heavy Duty Trucks are having highest hauling power of trucks and also are considered as the most specific and splendid vehicles of the industries as they are created to haul the heaviest cargo loads. These vehicles are having capacities of 19,501 pounds to 33,000 pounds. These gigantic weights can be converted as 14,969 kg. The most promising names in the manufacturing units of these heavy duty trucks are International, Mack, Kenworth, Peterbilt and many more of the names. The Class 6, 7 and 8 types are considered as the heavy duty trucks. The Beverage Trucks, Chipper Trucks, Fire Trucks, Packer Trucks, Heavy Trucks, Big Trucks are some of the names that are covered in the Heavy Duty Vehicles for sale.
