Different Kinds of E-learning Services

by Jon Smith

Article published on February 8th 2012 | Business

E-learning development encompasses all forms of electronically supported learning, teaching and training. In such a method of training, learning is enabled through computer and web-based learning and digital collaboration. The content of the e-course is delivered through internet, extra net, audio or video tape, satellite TV and CD-ROM. E-learning is also known as CBT (Computer-Based Training), IBT (Internet-Based Training) or WBT (Web-Based Training). E-learning services are categorized in different ways. In the following article, we have explored some of the most popular e-learning services.

Different Types of E-learning Services

Instructional Design and Learning Management System

E-development instructional design and learning management system focuses on designing e-courses to suit training requirements of different organizations. E-learning consultants are having expertise in development of e -commerce courses as per clientâ€™s requirements. In such services, the e- learning service providers build content on the basis of company's training requirements. E-course is also customized so that it can be accessed online, on hard media or through a learning management system.

Transforming Power Point Content into Web based training

With the growing popularity of e- learning and its unparalleled advantages, many organizations are turning towards this method of training. Many companiesâ€™ approaches for e-learning development for training their employees and many of them express their wish to convert their existing content, based on power point presentation for training, into web based training. E-learning consultants provide best technical solutions to make existing power point content adaptable to web based training modules.

Custom E-learning Courses

Custom e- learning courses refers to e-learning courses specifically designed to meet your organizational requirements. These courses are different from standard courses. Customers can get their course tailored to meet their specific expectations using custom assets such as specific voice, stories illustrations, photographs and 3D models. E- Learning consultants work with program coordinators to provide e-training solutions to reconcile their objectives.

2D Simulation and 3D Stimulation - Training Modules

E-courses prepared through using 2D and 3D stimulations prove to be more productive in terms of bridging the gap between the theory and practical. The expert e-learning providers follow this approach to create more innovative and result oriented e-courses. These courses are especially effective, when the targeted group of people is students. These courses can be easily integrated to existing learning management system.

These are just few categories of e- learning development services. E-learning development is a vast term and with its so many benefits, it has definitely emerged as one of the best ways of teaching and training even highly dispersed audience.
