Do you need to get rid of your Bankrupt stock? by [Mary Porter](#)

Article published on June 28th 2012 | [Business](#)

The past few years have been extremely difficult for all kinds of companies, in a range of sectors, and many firms may now have been left with stock and other items which they need to get rid of. However, after years of building up a stock of products which they had hoped to sell, business owners will not want to waste the money they have spent investing in their stock, which could make using bankrupt stock options a great move.

The turbulent global economy has left many companies with Bankrupt stock that they cannot shift, either due to lack of interest or the fact that their business has been declared bankrupt and is in the hands of the creditors, and this means there are plenty of new options available to those with bankrupt stock.

Here at M Brill Limited we specialise in bankrupt stock buying and clearance, and we work extensively throughout the UK, giving those with bankrupt stock the solutions they need to be able to move on from stock which is not going to be sellable.

Unlike many other bankrupt stock firms we have a wealth of experience in bankrupt stock and have not just sprung up as a result of the economic downturn – we have been providing bankrupt stock services since way back in 1919 and we have always been family run.

We specialise in bankrupt stock and we buy bankrupt stock and any unwanted goods from shops, warehouses and any other retailer. As well as bankrupt stock we buy damaged items, cancelled orders, abandoned stock and obsolete goods which no longer have a market value.

We understand that those who have suffered the collapse of their business will have enough to deal with without having to try and get their bankrupt stock to us, and this is why we offer a convenient mobile collection service.

All of our bankrupt stock clients can be sure that the prices they are offered by us for their bankrupt stock are the best around, and to give reassurance to our customers we even pay cash for bankrupt stock in advance of collection.
