What is Early Years Foundation Stage? Well, it is that stage of a life which lasts from the birth till the toddler reaches age five. It is government formulated, official structure that is followed by every kindergarten and primary learning institutes. There are specific curriculums to follow for providing education to these toddlers. The entire learning structure is pre-planned and formulated accordingly, that even includes proper development care and a suitable learning experience.

During the earliest years, toddlers need to be handled with extreme care and affection. Similarly, the learning experience should be fun and easy. But, by no means, should the matter be made complicated. It is necessary to focus on these issues. Early Years learning experience is crucial for both parents as well the kids. It helps in creating a strong base for the kid which will help during the future part of his/her career. There are different resources that can play meaningful part during these early years foundation stage.

Reading, learning, as well as game play resources are equally important during the developing phase of the child. The right kind of resources needs to be provided to the child for which proper research on needs to be carried out. There are plenty of websites from which information about these resources can be availed. Try to spend some quality hours before the internet and extract information about the best resources available for toddlers. Alphabet books, color pencils, writing learners, gaming devices like building blocks, dolls, as well different toddler furniture items like swinging chair and bed, tables, stools, cot, etc. are all some sort of early year resources. Each has some important role to play. However, it is necessary to pay proper attention while purchasing these items. They should be safe and secure to be used with toddlers.
