Article published on July 17th 2012 | Business

Extensible business reporting language (XBRL) is used to prepare and analyze reports pertaining to finance and commerce. The information can be stored and exchanged in the form of XBRL documents with the help of computer applications. This new technology facilitates preparation of proper business reports as well as accurate exchange and analysis of the same. There are numerous professional companies that render XBRL Services to business firms by way of helping them to prepare their financial reports according to the rules and regulations promulgated by the Seccurities and Exchange Commission (SEC). Though the companies can prepare SEC XBRL themselves or by outsourcing the procedure for preparing the report, many companies hire service providers who have the expertise in XBRL Reporting. These service providers make use of the latest tools and technology in order to ensure true and perfect accounting. They employ talented and highly experienced accountants and project managers who will be at the service of their clients throughout the project duration.

The interaction between the accountants of the XBRL Services agency and those of the client company ensures proper XBRL Reporting by way of formulating correct and useful data through discussion and evalauation. Moreover the accountants of the client company get the opportunity to learn and practice the SEC XBRL methods by working in close association with the experienced accountants of the service providers. The team of accountants from the service agencies makes the accountants of the client company also to actively involve in the processes of analysis, evaluation and formulation of data thereby infusing confidence in them in the task of preparing the reports. As a result they will be able to make successful submissions by way of gaining practical experience. These service providers offer a complete range of services including consulting, planning, selection of tags, evaluating and SEC compliant filing of reports.

Based on the resources of a company and their requirements they choose and hire the service providers for SEC compliant filing of reports. According to the rules of SEC all the companies must file their financial reports in the XBRL method only. Hence the demand for efficient service providers in this field will increase rapidly. Selection of the best tags is the crucial part of the process and only the experienced team of accountants can ensure the best selection of tags. Also, before filing of the reports the company has to ensure that the report is technically valid. This will be ably done by the service providers using proper validation tools as well as SEC filing techniques.
