GeogridÂ® - a Powerful Ground Reinforcement Grid for Outdoor Events by Christine

Article published on August 9th 2012 | Business

During an outdoor event, it is important to consider the need for protecting the grounds. This is to ensure that no accidents or extreme damages to grounds will occur. This can be achieved through the use of heavy duty ground protection products such as temporary access mats, ground reinforcement grids and cellular paving systems.

GeogridÂ®

One of the most reliable ground protection mats available on the market today is GeoGridÂ®. This is a cellular, interconnecting, ground reinforcement grid used for construction, groundwork, outdoor events and home development.

Designed and manufactured in the UK, this cellular paving system features an interlocking design for easy and fast installation, giving you a strong, level surface. In fact, its grass protection tiles can withstand up to 30 tonnes axle point load and 350 tonnes per square metre.

It is also made from 100% recycled polyethylene, making it an environmental friendly solution and safe product for workers, public and environment. Additionally, it comes with a marker block insert to mark out routes, parking spaces and disabled signs, providing a safer path for pedestrians, wheelchair users and vehicles.

To make it more stable and aesthetically pleasing, you can finish it off with ornamental stone, Bermuda grass and gravel.

Where Can You Use Geogrid

Geogrid is a very flexible ground protection solution that can be used to a wide range of applications, including emergency access lanes, driveways, golf courses, as well as car and truck parks. It is also ideal for areas susceptible to flooding or drainage problems because of its economical cellular paver filled with grass solution. Despite its extremely durable design, do you know that Geogrid is incredible lightweight, allowing at least two people to handle and install it with fast and easy? You can also use it for uneven grounds or areas with slopes and embankments.

Pointers to Remember

When looking for a ground protection solution, make sure to buy from the world leaders in ground protection. It is because they truly understand your basic needs and requirements. Take note that knowing exactly what you need is the best way to meet your requirements. It is also ideal to find a company that can provide an expert advice whenever you need them. Today there are several companies that offer such product, so be extra careful when choosing the right provider. Always consider the reputation and years of experience of the provider when buying ground protection.
