Article published on June 27th 2012 | Business

This is the twenty first century and everybody in today's world is keen and eager to know about the events and issues of the world. This is delivered to you by global news. Global news is basically news that has all the recent and current updates about the events that are happening all across the globe. It gives you information about every nook and corner of the all countries of the world.

Global news is featured on the internet. There are plenty of sufficient numbers of news websites and news blogs that deliver you with fresh and most recent news updates of the world. There are photos and videos that are made available on these websites for verification and authentication of the issue. Also, another benefit of online news is that it can be viewed from any part of the world and at anytime. Therefore, online news is very convenient and efficient and helps in saving a lot of time.

International news is projected in different countries in different languages. There are various television channels that feature only world news. You get updates about everything including politics, entertainment, celebrity gossip, stars and their stardom, movie reviews, a sneak peak in to the personal life of the stars, education, law, crime, literature, progress and regress in science and technology, climatic condition of nations, etc.

You can even subscribe to mobile news alerts and get the latest world breaking news on their cell phones within no time. Newspapers too, have columns which are especially reserved for all types of international news updates.

Along these years, media has emerged as a super power and people rely on it completely for almost everything. However, nowadays, media is taking advantage of this power and is leading the people astray. Sometimes TV news channels broadcast baseless and unwanted issues such as the lifestyle of the stars, their lavish and luxurious living, etc. This is highly unacceptable by the viewers. Even the minutest and the most unwanted detail are also, sometimes, featured as world breaking news. If this continues to happen, people will lose faith in the media.

Media needs to realize that an overdose of anything can be dangerous and that they should mainly aim on issues of world news importance such as poverty, illiteracy, unemployment, child sexual abuse, global warming, etc. so as to make each and everyone aware of the current scenario of every nation.
