Article published on January 8th 2012 | Business

Fluorescent Lights are the simplest form of light setting system witnessed in most of the household, offices, mechanic shops, libraries, scientific laboratories etc. whereas, a Track lighting is used mostly for all auspicious occasions ,seen much during festive seasons to attract oneâ€™s eyes towards something. Fluorescent Lights are affordable and used by all classes of people they have a very long durability and save a lot of time, energy and money. Track lighting is a little expensive and not been used by all sections. It does not illuminate much of light, is a little harder to adjust with under general circumstances, light therefore is not very brighter in this case and most individualâ€™s do not get adjusted to this kind of a lighting system they canâ€™t cope with it.

Fluorescent lights are responsible for giving rise to a thin gas vapor; the end result electrifies mercury with the help of electricity. Track Lighting doesnâ€™t stimulate much of lighting in the room its brightness is lesser when compared to the former. Fluorescent lights are regarded as the best usage lights, however need to be discarded separately from the other wastes carefully they can be recycled, used over and over again. Track Lighting is nevertheless; less dangerous it can be disposed easily with regular litter, without much tension in an individualâ€™s mind.

Fluorescent lights can be turned on and off innumerable times , it is never worn out under any situation, as an efficient energy source it can be used over and over again as many times as needed. Track Lighting is more of a show bulb it is dizzy and worn out easily. Fluorescent Lights can be used in the absence of electricity and can be used regularly for longer hours when charged systematically they are economically suitable for all environments. Track Lighting can be used in the presence of electricity.

Fluorescent lights are those plain white colored lamps best accorded in study room, living room, dining hall etc they are economically meager and watchful. Track Lightings are manufactured in numerous attractive colors and suite only bedroom ambiance to make it look cozy and simply perfect, they tend to be not so economical and have shorter life-span. But, incase a Fluorescent light is broken; it should be cleaned after sometime as it contains mercury in it. Track Lightings are usually well- designed and covered with glass in case broken can be cleaned immediately.
