Great uses for Castor Wheels by Julia Roger

Article published on March 19th 2012 | Business

Ever wondered what the world would be like without castor wheels? Well for starters it would be a lost less mobile, Castor Wheels are fitted to more products that you might think. As I type this article Iâ€™m sat on a chair thatâ€™s fitted with Castor Wheels and the wheels make the chair more manoeuvrable. Itâ€™s quite common for items of office furniture to be fitted with Castor Wheels, filing units; cabinets and equipment like photocopiers come with them as standard.

That makes you wonder what other items are fitted with Castor wheels supplied through manufacturers of weld on hinges.

What about trolleys?Yep, the humble supermarket trolley trundles up and down aisles on a set of castor wheels. I know this for a fact because every time I go shopping at the supermarket I manage to grab a trolley that seems to have a mind of its own, the Castor Wheels seem to go in any direction but the way I want them to!

In general though Castor Wheels that are fitted to shopping trolleys work with great efficiency and they enable you to move your trolley around the store with the minimum amount of effort even when itâ€™s fully stocked with groceries. Castor Wheels for trolleys are designed and developed by suppliers of premium grade weld on hinges. Okay so thatâ€™s trolleys covered, where else can you find Castor Wheels?

Get on the case

Or rather, have a look at the bottom of your suitcase, bet theyâ€™re fitted with castor wheels. Whoever thought about putting Castor Wheels on the bottom on suitcases deserves a medal in my book. Heavy cases are a pain to heave and hump about, let them run on Castor Wheels and it removes the strain.

Castor Wheels are great little additions to fit to a variety of equipment, they come in numerous sizes and wheel options and they are custom made by suppliers of weld on hinges. Youâ€™ll find Castor Wheels on portersâ€™ trolleys in hospitals they are fitted to mobile bookcases in schools and can be used on a wide range of small furniture items or put to use on equipment within industrial settings.
