# Hardhat Logistics Presents Gatehouse Control Cheshire for Ultimate Site Security by Hardhat

Article published on April 18th 2012 | Business

As a site owner you are bound to have sleepless nights given the present crime scenario in Cheshire. Most construction sites are incurring huge losses due to stealth within their premises. Moreover, as a construction business owner you would be ideally looking to take services from a sub contractors. Such sub contractors are also looking to cheat on their clients, by showing excessive use of manpower which isnâ€™t a reality. Both these facts strain the budget for any construction project. At times projects run behind date because of these facets affecting the reputation of the builder. So, what is the way out? There are various types of technological solutions for site security and employee accountability available at Hardhat Logistics. The company has been dedicated in the field of technology solutions for the construction site owners. There are various solutions for your problems present at the website.

Gatehouse control Cheshire is one of the popular site security solutions available at Hardhat Logistics. Hardhat has been providing superior gatehouse control systems for over 10 years now and they have a huge client base for this technology. The system allows tracking of people entering and exiting the premises. You can also gather information about time of entry and exit from gatehouse control Cheshire. System can be neatly integrated for manipulation of the time and attendance data. What this means is no unknown person can enter the premises. Also exact work amount of the employees at the site is clearly visible to you. The system uses hand recognition technology allowing better tracking information than the card systems. In the card system anyone not having the rights could get into the premises using someone elseâ€™s card, but this cannot be done with the hand recognition system. There are also options for manipulating data that will be helpful for productivity implications, health & safety, program analysis or performance and other commercial disputes. The gatehouse control Cheshire developed by Hardhat Logistics has site proven biometric hand recognition system.

The gatehouse control Cheshire system was developed in association with some of the major partners of Hardhat Logistics. While developing the system all the security logistics concepts were used. These would help site owners create a safe environment for personnel, plant and materials. Hardhat Logistics even went as far as testing the system with its on-site performance. Installation of this system led to:

â€¢ 7% reduction in material theft

â€¢ 3% reduction in wage costs by eliminating ghosting and tailgating.

â€¢ 20% increase in productive of agency labor.

â€¢ 100% compliance in Health & Safety, CSCS compliance, etc.

â€¢ KPIs on time & attendance data on every site operative.

Above mentioned facts are reasons enough to use gatehouse control Cheshire systems from Hardhat Solutions. But there are other attractive features of this system as well.

â€¢ Central tracking of movement between various client sites.

â€¢ Measurement and monitoring of the siteâ€™s performance against pre-decided schedules.

â€¢ Analysing data and using them for historic comparisons.

â€¢ Ideal platform for measuring KPI of sub contractors.

â€¢ Only authorised access to the site. Dismissed personnel can be quickly removed from the list.

â€¢ Proactive approach to health and safety compliance needs.

â€¢ Reduction in the resources required.

Now, can we safely assume that gatehouse control Cheshire systems from Hardhat Logistics are the ultimate way to make your constriction site safe?
