Article published on March 5th 2012 | Business

Nintendo in 1973 created the Laser clay shooting in which the players would fire at the targets that were displayed by the overhead projector. It was made in such a way that the mechanism of reflections would determine whether the target was hit by the laser shot or not.

archery shooting is an ideal event for corporate or social entertainment. It can be used as an entertainment in seminars, conferences, promotions and trade shows. Clay pigeon shooting is the best way to enjoy the outdoor games with the friends or with the clients. It helps in team building as well.

The traditional pigeon shooting included conventional rifles whereas the modern pigeon shooting consists of a laser gun that makes the game easier. The use of laser gun helps in aiming at a target much easier. Any gender and any person aged above 12 years can handle the authentic shotguns that are converted into fire harmless infrared beams.

Laser Clay Pigeon Shooting can be played anywhere in the open space. Clays with a reflective tape are fired from a launcher; the clays travel about 10 or 20 metres. The players have to fire authentic 12 gauge shotguns; up to five players can shoot at a time. They can shoot at the clay anytime they decide. Some players can even hit a clay pigeon twice before it hits the ground. That helps them in scoring extra points. The sound effects give a unique experience. One can gain expertise in this game within a short duration.

At the conclusion of the game, the winners are rewarded with trophies and medals. Laser Clay Pigeon Shooting is a challenging game and helps one to enhance his precision skills.
