Article published on July 11th 2012 | Business

Mosquitoes do not do any good to anybody in any sense. It can only spread diseases, disturb sleep and give itchy discomfort. Thus, it is better to get rid of it completely as soon as possible. However, it is not that easy as said. Everybody who lives in mosquito-infested areas have the same question, â€œhow to get rid of mosquitoes?â€• Several ways are there that can help you to get rid of this problem. You need to choose the most suitable option for you. There are chemical repellents that can be used to kill mosquitoes but most people do not like to opt for it.

People are more interested in natural ways to kill mosquitoes. The first step towards the mission is to use mosquito net while sleeping and cover your windows with nets. It is important to look for stagnant water body surrounding your house and if you find one, flush it or dump it as soon as possible. Mosquito breeding takes place in stagnant water and the places include unfiltered fishponds, old tires, empty flowerpots, etc. You cannot kill all mosquitoes in one day. You need to aim for decreasing the number when you begin.

Some even have the question how to kill mosquitoes with home remedies in mind but they also think that it is not possible. However, there is good news for them since mosquitoes can be killed using ingredients available right in your kitchen. Get garlic power and sprinkle around your house. It is a very good natural mosquito repellent. You can also use mint spray to get rid of mosquitoes. You can use the spray on your body and air. Then there is citronella, which can be used in any form to repel mosquitoes. Grow plants in your garden that are natural repellents of mosquitoes. These plants include catnip, citronella grass, rosemary, marigold, etc.
