IBM 4247 â€“ Effective Dot Matrix Printer with 700 CPS Speed

By Randy James

Article published on July 9th 2012 | Business

The IBM 4247 series of dot matrix printers are reliable, tough, durable, and fast in handling the toughest printing jobs with ease. This series has the ability to load a maximum of 6 different forms in printing device at a time. The series features maximum printing speed of 700 cps (Characters per Second). It has support for cut sheet & continuous form paper. 4247 series is finest in quality that offers reliable and flexile printing service according to demand of users. This impact printer series has the ability to print up to 8 different forms at a time. It supports a maximum of 6 different types of paper input sources, which are combined with switching, parking, & linking. This helps immensely in maximizing the print options as well overall productivity.

IBM 4247 series is enriched with APA graphics capability. This allows different applications to easily print bar codes, pie charts, bar charts, forms, CAD/CAM drawings, and scanned logos and so on. The printers are enriched with Ethernet 10/100 BaseT as well parallel, twinaxial, serial switchable and user installable interface cards. It is quite a network friendly printer. 4247 series also support IBM DSC/DSE and SCS data streams. Some of the printers also feature additional support for IPDS. The printers in this series also have support for different emulation variants, most popular ones being IBM Pro-printer & Epson printers.

IBM 4247 series is easy to operate. Some of the features include:

â€¢ Thickness adjustment of forms

â€¢ Automatic forms loading

â€¢ Paper selection

â€¢ Document on demand

Operator panel is less complicated in design and hence it becomes easier to manage the operator panel for different functions like form alignment, loading, selections, etc. There is a clear LCD display that reads messages and menus. Document-on-demand is one of the most effective features that allow manual ejection of paper and printing of next form. As a result, paper wastage becomes minimal.
