Article published on December 14th 2011 | Business

For hotel and resort owners there are certain toiletries that they have to provide to their guests. Out of them hotel soaps are one of the most important things that a guest can find in every type of hotel. However, the quality and type of soaps is largely dependant upon the hotel and resortsâ€™ category. Unlike home soap, hotel soap should also be of good quality and ingredients based on the season, like for summer seasons floral soaps can be provided and for winter season glycerin and milk cream based soaps can be given to the guests. However the packaging and size of hotel soap is very much different from regular home soaps.

In hotels and resorts soaps are much smaller in size in order to avoid wastage, and hotels usually print their logos and names on the soap packaging. If you want to get the right brand of soaps for your hotel, just put yourself in the shoes of the customers and likewise determine their needs. Usually the travelers select a hotel or resort on the basis of reviews given to a hotel, advertisements about a hotel, etc. They have various expectations from the hotel admin like good services, quality toiletries & amenities and cleanliness. Here the choice of soap is also very important.

This thing might seem small but it has great and lasting influence over the guests. Make sure the soaps that you provide are loved by your guests. According to guest category and their personal hygiene requirements the hotel soaps have to be selected. Usually good branded soaps are a standard choice for good hotels and resorts. It should be free from any kind of harsh chemicals. For high-end guests you can offer choices of soaps to choose from. Although it might be a small issue, in reality it affects the overall hotel reputation. It is suggested that you provide different types of soap standards for washing hands and bathing purposes.

Now-a-days many good hotels and resorts have replaced soap bars with liquid soaps which is also a fine option. The scent or perfume that is used in soaps has a very lasting effect on the guestsâ€™ memory. It creates an impression of the hotel in the minds of the customers. Avoid using very harsh and strong scents, instead use subtle and lingering scents. You can also get your soap made in customized manner from manufacturers of hotel toiletries.
