Importance of recycling empty toner cartridges:- by Jullia

Article published on December 3rd 2011 | Business

These empty toner cartridges end up in our planetâ€™s landfills or incinerators. According to a research study, every second around eight to ten cartridges are dumped into the landfill. . The scenario is very alarming when we consider the amount of damage it can cause to the natural resources stored inside the heart of the earth.

To overcome this nasty situation, it will not be wrong to suggest the recycling of these empty toner and laser cartridges. Recycling these cartridges is easy, profitable and environmentally beneficial. It helps reduce solid waste material and consumption of energy needed to produce a new product. A recycle toner cartridge can be used up to six times, thus saving the time and the amount of energy required to produce a new product. Recycled toner cartridges provide the consumer with same quality and output as the new cartridge.

According to a research, only 10 percent of the 250 million printer toner cartridges are recycled every year. With nearly 225 million cartridges going directly into the landfill, damages caused to our environment are quite significant. It is a well known fact that dumping of empty toner cartridges underneath earthâ€™s surface releases harmful gases such as Carbon Dioxide and Sulphur Dioxide. In addition to being environment friendly, recycling toner cartridges can save large sums of money for the consumers.

Large multinationals companies and even small scale business are enjoying the benefits of toner cartridge recycling these days. Using these recyclable cartridges allows the user to save their precious time. People who work with printers prefer to use recycle toner cartridges as they can easily refill the empty ones and save their valuable time. With a non-recyclable cartridge, the users had to throw them away and buy a new one from the market every time it ran out of ink.

GTRECYCLING providing recycling at affordable rates:-

There are many companies providing recycling toner cartridges and laser cartridges as u search for the businesses in this regard. Green Tech Recycling Company, also known as gtrecycling is a name listed high in the rank of companies, supplying their services to recycle and refill the empty printer cartridges.
