Article published on December 19th 2011 | Business

According to research study conducted by a team of students at Harvard University, it is estimated that more than eight cartridges per second are dumped in the heart of the earth. These empty toner cartridges are composed of elements such as carbon, sulphur, mercury etc. These substances are then decayed to react with oxygen. To overcome this nasty problem, it is our duty to take actions to stop this sinful and act of throwing empty inkjet cartridges and declare such activities completely illegal and un-ethical.

Hence there is a greater need to use recycle cartridges to control the amount of dangerous gases in the atmosphere. Recycle toner cartridges are extremely efficient devices. They are small sized and they are very easy to use. They can installed directly into the laser printer with ease. To remove them for refilling purposes, one just needs to open the lid of laser printer and push them inwards. In addition to being extremely environment friendly, these recyclable toners cartridges are very cost effective.

A recyclable laser printer cartridge can be refilled up to six times saving valuable time and cash for the users. By using these smart cartridges, schools, colleges and universities are saving millions of dollars every year. Educational institutions have the need to print millions of pages every day and they use large number of cartridges every day.

Multinationals companies and other business are also promoting the idea of using these smart cartridges to spread more awareness among their employees. Even small-scale businesses are saving extra pennies to survive in the era of growing economical crisis.

After getting used for their lifetime, these recycle toner cartridges are taken to the nearest recycling center. If you donâ€™t have the time to take your empty toner cartridges to these centers, you could consider exchanging them for cash. There are many companies operating in the market of recycle product companies.

However, among all these agencies Green Tech Recycling is the best. The company offers great rates for empty toner cartridges and they also provide great customer services to their clients. Also, if you are looking to place a new order with the, their highly qualified team of experienced professionals will guide you in the right direction. On more than twenty pounds worth printer cartridge recycling, they provide free pick up service.

With rates as less as twelve for each recyclable toner cartridges, they are one of the cheapest and most reliable companies operating in the market right now. So if you are someone who is interested to learn more about printer cartridge recycling, you are recommended to visit www.gtrecycling.co.uk
