Article published on April 9th 2012 | Business

Gone are those days when loyalty card program and gifts were believed to be the exclusive domain of Big Businesses. According to a recently concluded market survey in this regard, it has thrown some of the interesting facts about this aspect.

For instance, more and more business modules now prefer to opt for loyalty card program because of its affordability. With the rise in demand for this item, numerous service providers have joined the mad race to woo their customers.

Among a sizeable number of people choosing the loyalty card program are the small business owners. They contend that having this kind of item helps them to achieve their marketing objectives. Even the experts of this field vouch of this item being the perfect marketing tool.

Use of loyalty card program as a marketing tool allows them to reap a number of benefits. For instance, they have the potential of generating money for the business more instantly. Similarly, it gives them the much needed helping hand when it comes to increase customer retention. It may be noted, customer retention holds the key to survive this highly competitive market.

The use of loyalty card program in their business gives them the liberty to increase promotional opportunities and creating brand awareness. There are some business models that choose them primarily because it helps them in boosting the Prepaid Gift Sales. It has been found that they also play a crucial role in simplifying transaction and the management reporting.

It should be noted, the above mentioned advantages are some of the very basic pre-requisites that every business module needs to survive in this highly volatile market scenario. Yes, it is true the set up fees associated with it is little pricey. However, when you compare the benefits it brings for you all the way to the costs involved, it transpires to be peanuts. Experts recommend exercising of caution before you think of setting it up at your existing Point-Of-Sale terminals.
