Article published on December 15th 2011 | Business

Magento is a feature-rich, professional open-source eCommerce solution that offers individuals merchants and webstores complete flexibility and control over the look, content, and functionality of their online store. And as a CMS magento is way ahead of other web development environments.

Till June, Ebay was having 22% stake in magento. It acquired a desired onlook by the store developers. Once eBayâ€™s magento takeover happened the position of magento is rather strengthened.

As an ecommerce platform magento is enriched with the versatile ingredients needed by the developer community. Its opensource paradigm gives impetus for third parties to develop extensions for the same.

Well. Why extensions? â€¦the answer is to extend and extrapolate magnetoâ€™s capacity as a Content Management System (CMS).You have limbs and hands but you need slippers and gloves at times, ..That way Extensions act as accompaniments that enrich and emulate magento to make a development platform to be a near panacea for variety of web development needs..

Having defined the importance of extensions as necessary impediments..let us delve into whats on store as far as magento is concerned.

We, at kam technology provide a number of power packed magento extensions. Definitely indomitable in functionality, user friendliness, much needed in ecommerce arena.Our developers knew the need of a webstore once it started escalating to break the evens. So we thought it will be fantastic to have magento extensions that serve needs of a full fledged webstore such as shopping cart,Gifts,Model search, make and yearwise nested searchesâ€¦Choosing a product amongst hundreds of products in your showcase.tiresearch, and of recent We developed and introduced a new magento extension called â€œHide product price for Guest â€œ
