You are the administrator for a network that runs Windows Small Business Server (SBS) 2011 Standard. All network devices receive their IP addresses from the Windows SBS 2011 Standard server. You have a network printer that uses TCP/IP. You need to ensure that the network printer receives the same IP address every time the printer is powered on. What should you do?

- A. In the DHCP console, create a DHCP exclusion for the printer.
- B. In the DHCP console, create a DHCP reservation for the printer.
- C. In the DNS Manager console, create Host (A) and Service (SVR) records for the IP address of the printer.
- D. In the DNS Manager console, create Host (A) and Reverse DNS (PTR) records for the IP address of the printer.

Answer: B

There are a variety of courses obtainable for IT professionals worldwide. Because the IT business is growing quickly, it is very needed for IT professionals to be up to date in regards to the newest developments. It is precisely for this goal that courses like MCITP Enterprise administrator, MCSE certifications, etc., have been introduced.

As a result of rapidly increasing and developing IT industry, it is rather necessary for IT professionals to keep themselves abreast of these newest developments. It's with this goal in thoughts, that Microsoft has launched courses like MCITP and MCSE certifications. These programs can be found as on-line courses, DVD tutorials or as regular classes. MCITP enterprise administrator certification course is for IT professionals who need to specialize in their skills as an enterprise administrator. On the other hand, MCSE certifications are for IT professionals who've been working as system engineers, technical consultants, community analysts and system analysts. Allow us to take care of both the programs one by one.

Why MCITP enterprise administrator?

You may be an experienced IT professional. But, owing to the fast growth of the IT business, it is extremely necessary to preserve your self updated of the latest developments. Windows 7 system is now a favourite amongst residence users, enterprise people in addition to the tech savvy IT professionals. It's therefore necessary to adapt the talents to conform to the new technology and latest developments. MCITP certification won't only enhance your abilities and knowledge, but in addition make you an necessary asset for the employers. As a beginner, MCITP enterprise administrator or any other MCITP course will enable you to progress in your profession faster.

Course curriculum

MCITP certification course will not solely take a look at your knowledge and expertise, but also improve your information in Windows 7 and different new technologies.

MCSE

MCSE certifications are but again IT specialization courses. These programs are meant for individuals who after inspecting a company's needs, decide on the networking systems needed by the company. They design, set up and configure the system. Additionally they troubleshoot the problems arising in the system.

Programs

Microsoft gives two kinds of programs on MCSE certifications-

?MCSE on Microsoft home windows 2000

?MCSE on Home windows Server 2003

Benefits

An engineer who does the MCSE 2008 course can earn anything from \$fifty five,000 to \$ninety,000 each year in USA. Owing to their expertise and information, they're revered and appeared upon by the IT community. They will avail a 50% low cost on Technet or Technet plus subscription. Additionally they have access to Microsoft product and technical information. They'll entry the secure MCP website and have free entry to online journal for Microsoft certified professionals. Apart from this they've discounts on varied services and products of varied companies.

Profit to the Company

For corporations, hiring an engineer who has MCSE certifications has a variety of benefits. It purely means price cutting. They don't have to spend on maintaining workstations, PCs and IT professionals. It also means lesser time for installing Home windows 2000 which interprets into improve in productivity.
