Do you know that the right mesh grille can add to the look and performance of your car? Mesh grilles are available in local automobile stores and online providing infinite choices when it comes to decide on which type of custom mesh grill you should choose to install on your car.

Selecting the best fitting mesh grille might seem like a complex task, mainly due to the availability of the many styles that you need to choose from. However, you have to understand that when it comes to sporting a mesh grille for your car then you consider either a stainless steel grille or an ABS plastic grille.

Both stainless steel and ABS plastic mesh grilles make a good choice. But, it depends solely on your own preference and need. You have the choice of the long lasting steel made mesh grille and a durable plastic grille to select from. Both the grilles are found to be equally good with many pros and cons.

Plastic Mesh Grilles

A plastic grille is built of durable ABS plastic material. They are triple chrome plated for the luster shine which is unmatched. The major benefits of the ABS Plastic are

1. Light weight.
2. Inexpensive.
3. Resilient thermoplastic materials.
4. Rigid.

While not that strong as aluminum or stainless steel, ABS plastic still makes one outstanding medium for building the billet style mesh grilles as the plastic is resistant to rust and are found to be durable.

Stainless Steel Mesh Grilles

The stainless steel grilles always feature a well built stainless steel with the wire mesh material which come chrome plated or polished. The major benefits of the stainless steel grilles are:

1. Corrosion Resistant.
2. Strong/Durable.
3. Tough.
4. Resilient.
5. Customized.

The best part of choosing the stainless grille is that they are found to be incredibly tough when compared to the other available options. They can be easily fashioned into several shaped and

forms. For the added customization, you can choose stainless mesh grille. Without any sort of doubt, the stainless steel mesh design grille is found durable than ABS plastic mesh style design grilles.
