Modern Art Meets Science in DNA Portrait Printing by Jomarimorales

Article published on February 6th 2012 | Business

Genetic profiling and advanced imaging technologies have made it possible for anyone to have their DNA profile turned into art. The result is a type of modern art that is unique, inspiring, and deeply personal. You get to have the so-called strands of your being â€“ your very essence as an individual â€“ translated into a sort of â€œportraitâ€•that can be seen, appreciated, and displayed for the world to see. At DNA Art, ordering DNA modern wall art is made easy and convenient. We use your genetic code to create personalised art that will last for many years.

DNA Art takes your DNA profile and turns it into artthat may be customised according to size, frame, and style. Your DNA artwork may be stretched on canvas, printed on fine art or photographic paper, or mounted in our unique Acrylic Ice. We deliver stunning pieces of modern art that will look great in any interior. All orders are carefully processed and inspected. We aim to make this experience as inspiring to you as it is for us.

Your DNAprofile is made up of a unique pattern of bands and sequences that we highlight using fluorescent dyes and then photograph. We then enhance the digital image and customise it to apply the details you indicated in your order. These DNA patterns may be printed in over 50 different ways and framed in seven various ways. You are free totell us about your own colour and design preferences and we will do our best to make sure you get what you want. Up to four different DNA profiles may be printed on one canvas.

Each DNA art piece is unlike any other. For this reason, DNA Art is steadily becoming a popular choice among people who take the time and effort in finding the best gifts for their loved ones. Who would not appreciate receiving a modern art piece that is so profoundly connected with oneâ€™s personality? In a way, DNA Art is a great way to tell other people of how special they are and express how much they mean to you.

Pet lovers can also show their love and appreciation for their furry friends through the same process. DNA Art will extract your petâ€™s DNA profile from samples you provide and create modern wall art out of it! If you have more faithful companions at home, we can divide any frame size to fit all of your petsâ€™ DNA profiles. DNA Art accepts samples from most kinds of animals, including domestic and farm animals.

DNA Art provides you with artthat is truly original â€“ you wonâ€™t find something identical anywhere else in the world.Our website makes it easy for you to place your orders. You will be given options to choose from for the style, size, and frame of your DNA modern wall art. Once we receive your order, DNA Art will send you a DNA kit with step-by-step instructions on how to collect your DNA. The kit we send you will include paid-postage enveloped for sending back your samples to us.
