Article published on December 29th 2011 | Business

Jacksonville is the largest city in the state of Florida and it is the city with maximum land area in the US. With an estimated population of about 8 lakhs it is the most populated city in the east coast, New York City and Philadelphia being at the first and second place respectively. Besides being a center of transportation and distribution activities, Jacksonville has many diversified industrial and business activities. Financial services, IT services, bio-medicals, consumer goods and other manufacturing industries contribute to the economy of this city. This city has a well knit air, rail and road transport system and it is one among the busiest ports in US. Professional and managerial positions in Jacksonville employment are highly lucrative. Software Development Jobs, Jacksonville Fl and Project Management Jobs, Jacksonville Fl are among the frequently and widely listed jobs here. Besides the IT sector and manufacturing sector, opportunities for these two jobs are in plenty in the other sectors also such as educational services, finance and insurance, health care etcâ€¦

Software developers of the IT companies as well as other industries are required to develop custom software applications. These professionals are expected to develop systems that ensure cost reduction as well as risk prevention. They have to develop e-commerce applications also. It will be the task of the system developers to increase the customer base and volume of business by way of improving the quality of service. Software Development jobs, Jacksonville Fl demand longer working hours extending to late evening and week end days. The job involves travelling also since they have to be in the premises of the clients for days together. They must be good to work in a team and must possess excellent communication as well as organizational skills. Those who are sound in hardware and software and have proven track record can get into these jobs easily.

Project Management Jobs, Jacksonville Fl is available in almost all sectors of industry including banks, finance & insurance, health, education, IT and manufacturing. The incumbent will be responsible for implementation, execution and completion of the project as per standards provided by the respective organization. They have to finalize the plan and time schedules for execution of the project. They must ensure completion of the project as per schedule and also within the budget. Those who have project management qualifications, adequate exposure to relevant techniques and tools, proven experience and proficiency in management software will be able to grab these highly lucrative jobs. There will be more than one project simultaneously.
