New Company Registration Process and Services with Legal Benefits by Amit Singh

Article published on January 4th 2012 | Business

Whenever a company is starting, the first step should be the registration. A proper registration will always help you to run the industry tension free. Besides, it will enable you for the industrial incentives like tax holidays, subsidy on power charges etc being announced by the government from time to time. But many people do not know the benefit they are getting by registering their company. They fear about the registration as they think that it is binding them with certain conditions and they also do not want to spend much time behind the official formalities. This happens as there is nobody to a proper guidance to them. There are several professionals, who are engaged in company registration services and process. These professionals can help you in getting your company registered. Otherwise you can view the information regarding the process for company formation or incorporation in the official website of the Industrial department. This website offers the facility for online company registration too.

Besides the official websites, the sites of various private consultants and firms who are into this field also offers the same facilities. At a time, when you have to do a lot of work and no time to spend for it, you can avail the facility for online company registration. The advantage in doing so is that you do not have to spare from your busy schedule for this. It can be done even after office hours and can be done from anywhere in the world. If you still have doubts, it is better to contact any firms who are specialized in this area. They can guide you through the process of new company registration and llp registration procedures etc. Usually these firms will have enough staff to take care of all the needs. They will do the work right from the filling up of the application forms and do all the follow ups to register the company. They are charging very nominal fee for all their services.

Whether it is a company formation or incorporation, a lot of formalities have to be completed. A number of certificates have to be obtained from various departments. The procedures for a new company registration are totally different from the llp registration procedures. So, it may not be possible for a person to handle all these things single handedly. It is not affordable for a small scale industry to appoint somebody on salary basis to handle all these things. Here the service of the people who are engaged in the company registration services and process comes as blessing to the industrialists. The fees they charge for their services is very reasonable when compared with the service they provide. It is always better to get in contract with one such firm on a long time basis. Because, the company registration may be a single time process, but the benefits you are getting out of it may vary from time to time. In such cases you will require their help to move in the right direction.
