Once your certain permanent eyebrows are perfect for anyone by James Blee

Article published on August 23rd 2012 | Business

Donâ€™t get in a tizz if you â€“ in a rush to get out on the town - got a little tweezer- happy and landed yourself with Permanent Eyebrows not dissimilar to the ones seen on Eva de Wolffe in popular sitcom Footballerâ€™s Wives; wafer thin like a piece of preformed â€˜pork.â€™ Or indeed, you remain fed being nicknamed â€˜Scousebrowâ€™ and have natural eyebrows that resemble a single slug crawling across your forehead. These so-called, â€˜Permanent eyebrowsâ€™ that now adorn your otherwise, perfectly formed features need not be so permanent after all!

If you suffer from a natural tremor or canâ€™t risk pencil- applying your own semi- permanent eyebrows during your tram ride to work at 8am every morning but still need to fix the â€“ very obvious â€“ problem of your rushed handiwork; expert salon applied permanent eyebrows could be the perfect solution.

A new way to both look and feel amazing, eyebrow tattooing is only just being recognised to the everyday beauty novice but the application of permanent eyebrows is nothing new. Eyebrow tattooing is a cosmetic technique that creates permanent eyebrows to a recipientâ€™s features by employing permanent pigmentation of the dermis. Permanent eyebrows â€“ regularly seen on the likes of Coleen Rooney â€“ can be created to enhance a natural frame for the eyes and is the opportunity to create perfect symmetry of the face without the need for cosmetic surgery procedures.

Permanent eyebrows- as a product of eyebrow tattooing â€“ are gaining popularity amongst all areas of the female society as they can either make a youth appear older or knock years off an ageing granny. For those who continually make use of an eyebrow pencil (that never truly matches the exact shade of your natural eyebrow colour) and for those who have spare/ missing brows due to overzealous plucking, permanent eyebrows are especially popular and the creation of permanent eyebrows can take away the omnipresent worry of smearing semi- permanent pencil- drawn eyebrows.

100% safe and effective, permanent eyebrows could be for you. For more information about reliable yet affordable eyebrow tattooing services, visit www.beautycontours.com today and speak to Karen.
