Pool Repair: DIY Tips by James Blee

Article published on June 13th 2012 | Business

Swimming in a pool during hot weather is definitely relaxing and refreshing. Many of us own swimming pools in our homes and know that it is essential to properly maintain them. If you need pool repair is important you know what supplies are required to make the repairs. Concrete and gunite pools require replastering with time as hollow spots can be created, resulting in chipping and cracking. These types of repairs can easily be done on your own if you have the necessary materials and tools.

However, if you are dealing with fiberglass pools then the problems might be different as they get bubbles or blisters along with cracks. These types of cracks can be fixed using a fiberglass repair kit, which is easily available at your local pool supplier. The only concern regarding the repair of these pools is that the color of the fiberglass may be quite difficult to match with the existing one, which might make the repair noticeable. Most pool owners try to repair the cracks through pool plastering. However, they may be unable to repair serious cracks, leakage problems or replace pool mechanics such as pumps and heating systems.

Major pool repair definitely requires the help of a pool professional because if not done correctly, this may lead to more problems down the road. With professional services, you get an assurance that your pool is working well and is well maintained. Maintaining the pool is in your hands and hence it is advisable to ensure that the dirt, fine particles, and grime are cleaned well. Vinyl and vinyl-lined pools are easy to fix as long as you can locate the source of the leak or crack. Do drain the pool below the level of the tear and allow the vinyl patch to dry completely before refilling the pool with water.

The best way to avoid costly repairs is by doing it on your own but with care. Your swimming pool needs proper maintenance and if you pay catch and repair any problems on time, you can avoid costly repairs.
