Article published on June 17th 2012 | Business

With over three decades of experience in all aspects of design and construction solutions, from precast concrete retaining walls to fabric buildings, and bespoke agricultural structures, RGS Structures is sure to find a solution that will tailor to your needs.

Here at RGS Structures our knowledge and expertise allows us to provide tailored solutions for clients across a whole manner of sectors. Whether you need us to erect a series of small precast concrete retaining walls or structures for waste, recycling and composting, RGS Structures will complete all work in budget and in a timely manner, and all work will be completed to the highest standard.

Our precast concrete retaining walls are designed to the specific loading criteria, height and layout. These precast concrete retaining walls are a swift and highly cost-effective solution to enclose areas of all manner of environments. We employ only highly-trained groundwork and erection crews that have the ability to erect such precast concrete retaining walls that are infinitely durable and functional. In addition to these precast concrete retaining walls, here at RGS structures we can erect solutions, such as in-situ concrete, gabion and basket timber-crib if these are more suitable for your individual environment.

So, in short what are the principal benefits of employing RGS Structures to erect your precast retaining walls?

With over thirty years of experience in all aspects of design and construction we have an extensive knowledge of not only precast concrete retaining walls, but all manner of building structures. We offer a flexibility of service that includes supply only, design, supply and installation and ground works for full construction projects, or as your principal subcontractor. As a business we are committed to maintaining the high standards of health and safety, across all projects, from precast concrete retaining walls to all manner of structures, so those whom we employ, or indeed surrounding people are not affected by the work we undertake.

Should you like to find out any more information about the selection of services that RGS Structures can offer then come and visit us online at: www.rsgstructures.co.uk.
