Recycle Toner Cartridges- Think Green by [Julia Roger](#)

Article published on March 22nd 2012 | [Business](#)

Go green! Up to 60% of the rubbish that is thrown in the dustbin as a waste material can be recycled. The recycling process in UK is estimated to save more than 18 millions of CO2 each year. Recycling is the process of utilizing the old articles with the help of minor modifications. Millions of ink and toner cartridges are being simply thrown away every year as a waste material. These toner cartridges can be recycled if we take little care for them. The plastic materials that we use need millions of years to decompose. Recycling also creates jobs and hence helps in reducing the unemployment level of the country.

As unemployment has become a major problem for the developed countries of the world, recycling can thus help to reduce this unexpected level of unemployment. If we consider there has been a research that burning around 10,000 tonnes of waste material creates job opportunity for a single person. And throwing the same amount of waste materials to the landfill sites creates a job opportunity for 6 people but recycling the same amount of waste creates job for around 36 people. The cash for cartridges are made from reworked waste or parts of old toner cartridges.

Approximately around 20 to 30% of all sold toner cartridges are recycled only. Selling your used or empty toner cartridges is an easy way to cut your expenses on printers, copiers and other supplies. In the present ongoing market scenario everyone is interested in saving money so recycling is a good option. The budgets of the companies are getting small day by day because they want to minimize their expenses on cartridges and toners. The recycle toner cartridges can be used for saving the earth from unwanted waste materials and keeping it clean and green.

You can also donate your printer cartridges or toner cartridges to charity. Recycling helps us to make our environment clean and green. As soon as you recycle any type of cartridges then you are helping the environment in becoming it more clean and green. Printer and toner cartridges can be easily recycled anywhere in the local market because a lot of people are already engaged in refilling of such type of toners. If you return the used one cartridge and toners then you are going to get some cash for cartridges.
