Recycling empty toner cartridges gives added value for money by [Jullia](#)

Article published on December 2nd 2011 | [Business](#)

Everyday thousands of empty cartridges are thrown into the landfill, which causes severe damage to the environment and nature. Under the surface of the earth, large piles of empty discarded cartridges decay to give rise to alarming levels of Carbon Dioxide and Sulphur Dioxide. Therefore, to overcome this nagging issue, recycling of printer toner cartridges must be made mandatory and the sinful act of dumping of empty toner cartridges should be declared as illegal.

Damage to the environment can be lessened considerably using recycle cartridges. The idea of recycle cartridges should be promoted at all levels to control the amount of Carbon Dioxide and Sulphur Dioxide. If you have a personal computer or own a small business, you would have used toner cartridges at some stage in your life. Cartridges are very technical devices, designed to print your documents through a printer. Modern day cartridges are extremely efficient and they will get the job done well and quickly.

However, everything has its limitations. The toner cartridges are thrown away after they have used up their ink. Most of us are still unaware of the importance of recycling empty toner cartridges and we dump them into the landfill or other waste handling centers. But we must realize cartridge recycling can play an important part in creating a better environment for this world. There are basically three methods of recycling empty toner cartridges. One way is to return the used up cartridges directly to their manufacturers so that they can heat and mould them into other plastic products.

Some people prefer to use refill toner cartridges instead of returning them to the manufacturers. Refill toner cartridges are designed in such a way that they could be taken straight off the printer and refilled to extend their lifetime. If you do not have the time to do all that you may consider giving the empty toner cartridges to local business. Chances are that they will reward in some way as an appreciation to your gesture.

Multinationals and other powerful organizations are promoting the idea of cartridge recycling. In addition to being environment friendly, recycling cartridges are extremely cost effective, saving large sums of money for both business establishments and manufacturers. There is a wide range of recycling cartridges products available in the market right now. However, if you are an owner of a small business or a buying manager at a multinational company, you will be certainly looking for value for your money.
