Roger Hamilton and His Efforts to Foment the Real Human inside an Individual by Corwin Smith

Article published on January 10th 2012 | Business

Roger Hamilton is one if those people who never take a challenge lying down. And the biggest challenge that he ever faced was that he was a part of the system that looked so promising on the face of it but two miles down the line and the real face just shows up. And when that real face shows it is merciless, fruitless and more than that it is just plain ugly. And Roger spent his entire childhood and his entire years of education in studying the same economic system that really is nothing more than a giant carcass that looks so beautiful on the face of it but deep down it is rotten and stale.

One of the most important things that Roger Hamilton.did was that he realized it quite early in his professional life and then immediately changed his path. But the issue that then cropped up was that there was no alternative path to the existing system. And thus the only option that was left to him was to chalk out his own path, or to put it in other words it was left to him to create a new system of wealth creation that would put an end to the misery that so many of the people around the world following the same old school of thought as far as the wealth creation and the economic system was concerned.

And Roger Hamilton did not do anything wrong. He simply decided to chalk his own course and find the real meaning of wealth as well as the real art of wealth creation. And what he realized was that the missing link was the entity that is all pervasive, all powerful, and not to forget the all deciding. And Roger did not hesitate in incorporating this all deciding thing called Nature in the art of wealth creation.

In order to make the complex topic all the more easy for the people to understand Roger created set of theories like the wealth dynamics, wealth spectrum, among many other theories that really opened the eyes of the people around the world as far as the art of wealth creation was concerned. And the best gift that Roger did was that Roger Hamilton.did that all from the bottom of his heart, and that too to elevate the real human being inside the heart of the people so that that human being can really guide the individual in creating wealth and that too without chasing it.
